**Departmental
Findings of Fact and Order
Part 70 Air Emission License
Amendment #3**

After review of the Part 70 License application, staff investigation reports and other documents in the applicant's file in the Bureau of Air Quality, pursuant to 38 M.R.S.A, §344 and §590, the Department finds the following facts:

I. REGISTRATION

A. Introduction

FACILITY	The Dingley Press, Inc. (Dingley)
PART 70 RENEWAL LICENSE NUMBER	A-506-70-H-R/A
LICENSE TYPE	Part 70 Section 502(b)(10) Change
NAICS CODES	323110
NATURE OF BUSINESS	Commercial Lithographic Printing
FACILITY LOCATION	Lisbon, Maine
RENEWAL LICENSE ISSUANCE DATE	October 3, 2006
AMENDMENT ISSUANCE DATE	September 28, 2009
LICENSE EXPIRATION DATE	October 3, 2011

B. Amendment Description

The Dingley Press, Inc. (Dingley) was scheduled and set up to perform stack testing to comply with their Air Emission License A-506-70-H-R/A, Conditions (15)(E) and (J). Unfortunately, on August 18, 2009 the on-site stack testing trailer caught fire and critical equipment was damaged. Due to this the stack testing company will be unable to perform the required compliance testing prior to September 26, 2009.

Based on the reasons noted above, Dingley has requested a Part 70 502(b)(10) Change to their air emission license to clarify that the deadline for stack testing this year is December 31, 2009 and that future stack testing should be performed every two calendar years thereafter.

C. Application Classification

The application for Dingley is not a modification under Section 5 of MEDEP Chapter 140. The changes are not physical changes in, or in the method of operation of, any stationary source. The changes will not cause emissions in excess of any licensed standard nor the emission of any pollutant not previously emitted. Therefore this amendment is determined to be a Part 70 Section 502(b)(10) Change and has been processed as such.

ORDER

Based on the above Findings and subject to conditions listed below, the Department concludes that emissions from this sources:

- will receive Best Practical Treatment;
- will not violate applicable emissions standards
- will not violate applicable ambient air quality standards in conjunction with emissions from other sources.

The Department hereby grants the Part 70 502(b)(10) Change A-506-70-K-A pursuant to 06-096 CMR 140 and the preconstruction permitting requirements of 06-096 CMR 115 and subject to the standard and special conditions below.

Federally enforceable conditions in this Part 70 license must be changed pursuant to the applicable requirements in 06-096 CMR 115 for making such changes and pursuant to the applicable requirements in 06-096 CMR 140.

For each standard and special condition which is state enforceable only, state-only enforceability is designated with the following statement: **Enforceable by State-only.**

Severability. The invalidity or unenforceability of any provision, or part thereof, of this License shall not affect the remainder of the provision or any other provisions. This License shall be construed and enforced in all respects as if such invalid or unenforceable provision or part thereof had been omitted.

The following shall replace Condition (15)(E) of Air Emission License A-506-70-H-R/A:

- E. Emissions from Press #4 shall vent to a catalytic incinerator that will achieve 95% destruction of VOCs from the dryers. Compliance shall be demonstrated by stack testing by December 31, 2009 and once every two calendar years thereafter. After two sets of successful compliance demonstrations, Dingley may apply to reduce the frequency of stack testing required. [A-506-74-C-A/R (11/10/93) and 06-096 CMR 140]

Departmental
Findings of Fact and Order
Part 70 Air Emission License
Amendment #3

The following shall replace Condition (15)(J) of Air Emission License A-506-70-H-R/A:

- J. Emissions from Presses #3, #5, #6, #7, and #8 shall vent to a thermal oxidizer (either RTO #1 or RTO #2) that will achieve no less than 97.5% destruction of VOC from the dryers based on 1000 ppmv or higher VOC inlet measured as propane at actual air stream conditions. If the inlet VOC content is below 1000 ppmv, the VOC outlet shall not exceed 25 ppmv at actual stack conditions. Dingley shall demonstrate compliance with the destruction efficiency for RTO #1 and RTO #2 by stack testing each by December 31, 2009 and once every two calendar years thereafter. After two sets of successful compliance demonstrations, Dingley may apply to reduce the frequency of stack testing required.
[A-506-70-F-A (9/17/04) and 06-096 CMR 140]

DONE AND DATED IN AUGUSTA, MAINE THIS 28th DAY OF September, 2009.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

BY: James P. Littel
DAVID P. LITTELL, COMMISSIONER

The term of this amendment shall be concurrent with the term of Air Emission License A-506-70-H-R/A.
